

JOB DESCRIPTION: JUNIOR JAVA DEVELOPER

REF: JJD0723

Company

Software development company is looking for new talent in Pretoria (Far East) to work in the exciting world of satellite imaging. We build cutting-edge software products used by international customers across the globe.

Requirements

- BSc bachelor's degree in engineering or computer science
- Great opportunity for graduates, but industry experience of 1+ years is preferable
- Experience with strongly typed languages (e.g., Java, C#, etc.)
- Knowledge of software patterns and development best practices
- Permanent positions on site

Role

Development

- Day-to-day Java and web front-end development.
- Work on new and existing products and product eco-systems in a distributed environment that includes online portals, web applications, server software, and web services.
- Work together with Senior Developers to implement new solutions and improvements.
- Collaborate with the Project Manager to plan milestones, provide project breakdowns, and prioritise development activities.
- Stay up to date with new technologies in your field.

Testing and support

- Write well-designed, testable code
- Test and troubleshoot software
- Prepare releases
- Provide technical support to the Support teams
- Compile technical and user documentation

Technologies

- Java, Spring Framework
- Angular, Typescript
- RESTful Web Services, message queues
- SQL and No-SQL Databases

You will need to be:

- Excited about technology
- Comfortable working in a dynamic environment
- Analytical, critical thinker, creative problem solver
- Able to clearly express ideas, concepts, and opinions
- Able to understand a complex system as a whole

- Able to break down complex problems into smaller parts and translate it into actionable tasks
- Love building software

To apply, please submit your resume and a cover letter detailing your relevant experience and why you believe you are the ideal candidate for this position to jobs@pinkmatter.com (Ref: **JJD0723**)
