JOB DESCRIPTION: UI FRONT-END DEVELOPER

REF: UID0723

Company

Software development company is looking for new talent in Pretoria (Far East) to work in the exciting world of satellite imaging. We build cutting-edge software products used by international customers across the globe.

Requirements

- BSc degree in Computer Science or equivalent
- 3+ years of demonstrated front-end development experience using modern frameworks such as Angular, React.js, and Typescript
- Experience with technologies such as D3 and Mapbox will be beneficial
- Fluent with Javascript
- Permanent positions on site

Role

Development and design

- Day-to-day web front-end development.
- Develop user interfaces that interface with our product eco-systems in a distributed environment that includes online portals, web applications and web services.
- Build storyboards to conceptualize designs.
- Seek to enhance the user experience through intuitive interfaces.
- Use coding to develop the aesthetics in accordance with the company brand.
- Collaborate with back-end web developers and programmers

Testing and support

- Conduct testing of completed applications, websites, and software to assess user experience
- Professional written and interpersonal skills
- User documentation and training material

Technologies

- Javascript, Typescript
- Angular and/or React.js
- HTML, CSS
- SCSS or SASS will be beneficial
- RESTful Web Services, message queues

You will need to be:

- Excited about technology
- Comfortable working in a dynamic environment
- Analytical, critical thinker, creative problem solver
- Able to clearly express ideas, concepts, and opinions
- Able to break down complex problems into smaller parts and translate it into actionable tasks
- Love building software
- Love building beautiful and intuitive front-ends

To apply, please submit your resume and a cover letter detailing your relevant experience and why you believe you are the ideal candidate for this position to jobs@pinkmatter.com (Ref: **UID0723**)
